

R. JAMES (Jim) McKEE

Project Consultant Consultech & Associates, Inc.

Jim McKee has seasoned construction experience acquired during more than 40 years in the building industry. His comprehensive knowledge of construction technology has been attained in areas such as engineering and architectural design/specifications, strength and materials, environmental and safety regulations, state/local building codes, zoning ordinances, and permit processes.

Responsibilities include monitoring and reporting construction phases of large, multi-million dollar commercial and multi-family projects funded by major lending institutions nationwide. Additional responsibilities include structural inspections and evaluations to determine the cause and extent of damage claims arising from storm events.

Jim's previous positions and work experience include estimating, Clerk of the Works, quality control and construction administration for architectural and engineering firms, review of shop drawings, preparation of change orders and monitoring of construction projects.
